CRITICISING A BROTHER.

Pointing Ont His Fanite, and Shiwing Him that He is All Wrang. Among the co-operative societies of the United States, it is the practice to criticise a brother or a sister when he or she deserves it. A correspondent, who was present on one of these occa-

who was present en one of these occasions, says:

The young man to be criticised, whom I will call Charles, sat inconspicuously in the midst of the company. When the doors were closed, he was asked by the leader whether he desired to say anything. Retaining his seat, he said that he had suffered for some time past from certain intellectual difficulties and denbta, but that he was combsting the evil spirit within him, and hoped that he had gained somewhat; and so on. Horeupon a man, being called on to ne had gained somewhat; and so on. Hereupon a man, being called on to speak, remarked that he thought Charles had been somewhat hardened by too great good-fortnie; that his success in certain enterprises had somewhat spoiled him; if he had not succeeded so well, he would have been a better man; that he was somewhat wise in his own extern. he was somewhat wise in his own esteem; not given to consult with others, or to seek or take advice. One or two men agreed generally with the previous remarks, had noticed these faults in Charles, and that they made him disagreeable; and gave examples to show

chartes, and that they made him his-agreeable; and gave examples to show his faults. Another concurred in the general testimony, but added that he thought Charles had lately made efforts to correct some of his faults, though there was still much room for improvement. A young weman next remarked that Charles was hunghty and supercili-ous, and thought himself better than others with whom he was brought into contact; that he was needlessly curt semetimes to those with whom he had semetimes to those with whom to had to speak. Another young woman added that Charles was a respecter of persons; that he showed his liking for certain individuals too plainly by calling them pet names before people; that he seemed to forget that such things were disagreeable and wrong

The Raising of Grapes.

At a recent meeting of the Cumber-land county (N. J.) farmers' elub, the subject of grape-ciliure was thoroughly discussed, and much interesting information elleited. The conclusion was general that the culture of the grape was profitable, if the fruit were sold directly to the consumer by the producer. Simon A. Beckhardt, one of the members, professed to a considerable knowledge of grape-raising and wine-making. Taking the yield of an acre of grapes at two tons, and the price at two cents a pound, the the yield of an acre of grapes at two tons, and the price at two cents a pound, the yield would be eighty dollars per acre. The yield of Vineland has exceeded five tons, and the prices have largely exceeded two cents a pound. The fear that the market would become glutted has proved groundless. Every producer, if he chooses, can make his own wine. Twenty barrels, of ferty gallous each, is a fair vield to the acre. Cuttings started

a fair yield to the acre. Cuttings started from the vines will lear in the vines will make ene gallon of wine—granes at five cents a pound will cost seventy two cents, and other expenses give the whole cost some-what less than one dollar a gallon. Mr. Beckhardtrecommends that every farmer put a few acres in grapes, which, added to grain and fruit culture, would yield din a handsome revenue every year.

Mr. Miller reported that in Vineland they raise from cuttings of three eyes, haid eighteen inches apart in furrows, and covered with the hoe. He prefers

buying them already started, as a year is saved, and they are sold cheap.

Mr. Beckhardt stated that in Europe a trench is dug knee deep, which is left open all winter. In the spring the enttings are put in the bottom, covered lightly with soil, then manure is added so the cultings are quito deep, and nearly

nll live.

All the sections in New Jersey which have gone into grape raising are prosper-ons. In setting grapes to stakes, three and a half by four and a half feel is the common distance; but the vine trellis is considered the best. The rows should But the time had arrived when the question of the English marriage had to be settled. King Leopold desired that some decisive arrangement should be made for the year 1839; but to this the considered conclusive. Sho was herself, sho urged, too yeung, so also was the Prince, and, moreover, his mastery of the English language was still twey imperfect. The Prince, en being made aware of what was proposed, and of the necessity of delay, very sensibly gelared himself willing to subunit, if he had only some certain assurance to go upon. "But," be said to King Leopold, was time the sense of the energy of the English language was still that he had only some certain assurance to go upon. SCHOOL SUPERINTENDENCY.- We can ut look upon the action at the annual relation to the School Superintendency, as unfortunate, using the mildest term which can be applied to the vote of the meeting. We do not wish to be considered a mere "respecter of persons" in on advocacy of the claims of the present Superintendent, as it is purely a question o merit on his part, and one of profit on the part of the town. On these two points we are prepared to show by abundant evi-

This cut is a fac simile of the brand of Flour of which 20,000 barrels were sold by us during the year 1874, and it makes better bread and 10 per cent, more of it than any Flour that can be bought in Boston at anywhere near this low price, namely,

Taylor's Flour works easy; any cook can make good Bread from it. It is very sweet and will not dry up like many higher priced Flours. We are the only receivers of this brand of Flour for the New England States, and none can be had without first passing through our hands. Use one barrel of this Flour and you will always buy it, as it suits everybody.

egar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the properlied express of Vinegar Bitters and the control of the cause of the properlied express of Vinegar Bitters and the cause of the properlied express of the cause of th unparallelod success of VINEGAR BIT-TERS!" Our answer is, that they remove the cause of disease, and the patient rethe cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect kenovator and invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable, qualities of Vinkoar Bitters in healing the sick of every disease man is her to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Billows Diseases.

The properties of DR. WALKER VINEOAR BITTERS are Aperient, Disphoretle, Carminative, Nutritions, Laxative, Diuretle, Sedative, Counter-Irritant, Sudoriii - Alterstive, and Anti Bdions.

This cut is a fac simile of the brand of Flour of which 20,000 barrels were sold by us during the year 1874, and it makes better bread and 10 per cent, more of it than any Flour that can be bought in Boston at anywhere near this low price, namely,

Taylor's Flour works easy; any cook can make good Bread from it.
It is very sweet and will not dry up like many higher priced Flours.
We are the only receivers of this braud of Flour for the New England States, and none can be had without first passing through our hands.

Use one barrel of this Flour and you will always buy it, as it suits everybody.

A very interesting story is now current in New York vity in inshionable and philanthropic society.

According to this narrative, a lady of advanced years and great social distinction, who is conspicuous for her energetic and efficient benevolence, had her pocket picked recently of a wallet containing about \$500, a large portion of which she had collected for a well-known and most deserving churity, of which she had collected for a well-known and most deserving churity, of which she is a prominent namager. Of this man have toses. She was greatly disturbed the head of the contents when the servant one day told her that a strange-looking man desired to soo her in the parlor. She went down without any strain what was to follow. Her visitor, addressing her by name, said:

"Madom, you have lost a considerable sum of noney, and I have come to read the subject, and we have contents that it was stolen by jucking your procket; lint the fraternity have considered the subject, and we have contents when the subject, and we have contents that it was stolen by jucking your procket; lint the fraternity have considered the subject, and we have contents that it was stolen by jucking your procket; lint the fraternity have considered the subject, and we have contented to the subject, and we have determined to restore the subject, and we have contented to the subject of the properties of the visit packet-back. Here it is with its contents muliminished, and I trust you will not be unwilling to receive and apply, as you apply so much other money, a small addition which we have taken the liberty of making." Saying this he handed her the pocket-book and left the house without waiting a moment. Ou opening the pocket-book she found everything that she had lost and one hundred dollars added by the pickpockets for henevolent purposes.

Their fears were strengthened by the unmerous burglaries that had recently attempted to his place in that vicinity.

The residence of the old men was some distance from the main read, and stood near the river Scine. It was a lunely, gloomy location, and on the night in question the winds swept through the tall larches surrouading the mansion with deleful and meaning cadence.

About midnight the old men retired; but scircely had they fallen askeep when

A nice little entertainment was given in the Reading Room of Lyceum Hall, by a society of young people calling themselves the L.D. K's. Quite a goodly number of their friends were assembled and really their, entertainment was well worth the trouble, although the walking was very bad. You see we have had a bittle snow flown our way, Mr. Editor, perhaps you have hall some too. Miss Auy Allen, the wide awake antlefficient President of this society, a pologized for the small numbers.

Mrs. Linus Belcher's Vegetable Medicine!

CURE FOR FEMALE WEAKNESS.—
Treceived an Indian receipe from which I prejured some for myself, which resulted in a cure. Supporters are not used under any consideration. Its effects are wonderful in the relied and cure of Prodapous Eteri, Nervous Debility Weakness of the Back and Limbs. Dyspepsia, Palpitation of the Heart. Depression of Spirits. Irregularities, Change of Life, Whites, Drojesical Affections. Billionaness, Indamnation of Kidneys, Headnehe, Spinal Complaint. Rheumatism. Dizziness in the lead; makes new blood and strengthens the whole system.

CURE A MRS. LINUS BELCHER: I have sold out the mellicule Dought of you, and I can raily vay that I believe it to be the GREATEST REMEDY for humors out best BLOOD CLEANS. ER I ever know, It excels sill the humor medicines of this age for SALT BILEUM, which is the peat of this age for SALT BILEUM, which is the peat of this age for SALT BILEUM, which is the peat of this nation. My humband inherited SALT BILEUM from his mother and LIVER COMPLAINT. For years, in warm weather, he was ferble, his skinglabby and sallow, no appetite, had howard heet and compliment of the sallow and sallow, no appetite, had howard heet and somethines faintness and namera, also a heart lifticulty. In winter and at soone other thines have had boils, crysipelas socra, which finally ended in a hraw ny substance gathering on his head, in his beard, and in spots on his body, with an itching, burning etc. At length play neisns pronounced its sit Bheum, It afflicted the skiu and also ate into the flesh till warm weather came on, and then would sink into a consumplive's grave. It's thood was thin and watery, and often had a cough, and had the palpitation severely it he overlaced his strength, or if his stonach was couply; this was lor over lifteen grave. Lest August his homor struck inwardly, had nausea and pain in his bowels, and we thought he sould not hive much longer. I hagdingly said I would give a bin some of the FEMALE CURE, and that would give him one of a proper in a popular, and a lead-time, he taok a indiseponation. It kept has bowels regular, threw out the humor, gave him on appetita, cured his heart difficilly, and after taking seven bottles the humor was killed. He confluend to take your MEDILINE mut he had taken twyle kottles.—Now his flesh and skin hooks like new, and he is hearty and happy. All prake is due to your medicine. This cut is a fac simile of the brand of Flour of which 20,000 barrels were sold by us during the year 1874, and it makes better bread and 10 per cent. more of it than any Flour that can be bought in Boston at anywhere near this low price, namely,

Taylor's Flour works easy; any cook can make good Bread from it. It is very sweet and will not dry up like many higher priced Flours. We are the only receivers of this brand of Flour for the New England States, and none can be had without first passing through our hands.

The death of Senator Sumner recalls the assault made upon him by Brooks. The dutails were as follows: In May, 1856, Mr. Bumner delivered a speech in It often happens that eggs get frozen so as to crack the shells in sovere cold waather, and are of course unfit to sell; but if they are kept frozen until needed for use, and then brought into a warm from and boiling water poured over them, than left till cool, the egg will be Summer with a heavy cano as he was sit-ting in his cheir writing letters just after the Senato had adjourned; while Lawrence M. Keltt, another South Carolina member, stood near at hand,

Milking clean is very important. It is sometimes a good plan to draw all the milk yon can get and then let the calf remain with the cow for an honror so. It will milk clean.

Horses that have been nearly idle all winter should now be werked moderately and fed batter. Do not expose them to cold atorma. Be careful to bilasket them when they have to stand when heated. Clean thoronghly.

Swine are now attracting renewed attention. The prospect for breeders and feeders are encouraging. This stock is worthy of better care than it usually receives.

Little plgs will come by the million this month and the next, and as nesally managed will die by the thousand.—

Pin, Tupe, and other Worms, larking la the system of so many thomsands, are effectually destroyed and removed. No system of medicine, no vermilinges, no anthelminittes will free the system from worms like these litters. For Female Complaints, in young or old, unrried or single, at the dawn of wo-manhood, or the turn of life, these Toals litters display so decided an influence that improvement is soon perceptible. Cleurse the Vitinted Blood whenever you find its impurities bursting through the skin in Pimpies, Eruptions, or Sorres; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
